CSC 402 — Mobile Application Programming

AI Use & Disclosure Log

CSC 402 — Mobile Application Programming — Term Project

Team Number: 4

Project / App Name: LocalLens – Discover Saudi Arabia

Policy Reminder

- AI is a permitted pair programmer, not a ghost writer: it may assist with drafting, debugging, explaining, or scaffolding code and documentation, but the team must understand, verify, and be able to explain everything submitted.
- Every meaningful use of an AI tool (Gemini in Android Studio, ChatGPT, Claude, Copilot, or similar) toward project work must be logged — code, UI text, documentation, images, or planning.
- Log entries should be added as the work happens, not reconstructed retroactively before a milestone deadline.
- Undisclosed AI-generated work that is presented as original, unassisted work is treated as an academic integrity violation under the course's academic integrity policy.

Log

Add one row per instance of AI assistance. Continue on additional pages if needed — do not delete unused blank rows until final submission.

Date	Team Member	AI Tool Used	Milestone	Task & Description of Assistance	Verified / Modified by Student?
Sep 10	Zahra Alabkari	ChatGPT	Milestone 1	Assisted in refining the app concept, clarifying project requirements, and structuring the proposal details.	Yes
Sep 10	Zahra Alabkari	Gemini	Milestone 1	Assisted in understanding and preparing the GitHub repository requirements and project submission structure.	yes
Sep 10	Zainab Alhabib	ChatGPT	Milestone 1	Helped us refine the wording and present our project ideas more clearly	yes
Sep 10	Nawal aldossary	Gemini	Milestone 1	Reviewed the suggested points, selected the ones relevant to our team's skill level and schedule, and edited them into our own words.	yes
Sep 10	Fatema Almahoozi	ChatGPT	Milestone 1	Used ChatGPT for rephrasing and improving the project description.	Yes
